

## Overview of the FlexiDome range

FlexiDome I	FlexiDome II	FlexiDome <sup>XT</sup>
Standard protection	Standard protection	Impact resistant
Monochrome or color	Monochrome or color	Monochrome or color
Standard resolution	High resolution	High resolution
Fixed lens:	Fixed lens:	Varifocal lens:
2.1 mm super wide angle	2.1 mm super wide angle	2.8-6 mm standard lens
3 mm standard	3 mm standard	3-6 mm F 1.2 fast lens
6 mm telephoto	6 mm telephoto	4-9 mm telephoto lens

### Full line-up of professional FlexiDome cameras

The FlexiDome series from Bosch Security Systems offers a wide range of dome camera solutions for use in virtually any surveillance and observation applications. The series includes:

- ▶ A full range of lens options, from super wide-angle to telephoto.
- ▶ Standard and high-resolution cameras, both color and monochrome.
- ▶ Choice of accessories for indoor and outdoor use.

### Part of a professional security solution

The FlexiDome cameras are part of the total Bosch range of security solutions. They combine professional design, construction and performance, giving system integrators and installers a full range of cost-effective solutions to their customers' needs.

### Tradition of quality and innovation

For over 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems proudly offers a wide range of fire, intrusion, social alarm, CCTV, management and communication systems and components to help you find the solution for any application. We are the global supplier of choice for innovative technology backed by the highest level of service and support. When you need solutions you can rely on, choose Bosch.

## Design details that make the difference

### A durable solution

Thanks to its impact-resistant design, FlexiDome<sup>XT</sup> offers a durable solution where cameras are exposed to risk of damage. As well as the high-impact bubble, FlexiDome<sup>XT</sup> has shock-resistant mountings for extra protection. The IP66 (Nema 4) rating allows for use in wet or dirty conditions.

### Excellent picture quality

The FlexiDome cameras offer excellent picture quality under varying lighting and environmental conditions. The high-performance sensor, digital signal processing and automatic features ensure maximum clarity in changing lighting conditions without manual adjustment.

### Selection of exactly the right picture

Simple camera alignment and varifocal lens adjustment allow on-site selection of the desired field of view. For accurate focus setting, the lens adjustment tool simulates the presence of the camera's outer dome. Camera set-up is simplified by a portable monitor connection.

### Quick, easy installation and connection

Installation is quick and easy, thanks to the fully integrated system design and wide-range power supply. Flexible configuration allows the camera to be matched to specific surveillance requirements without complex, time-consuming set-up procedures. Quick connection is ensured by screw terminals for power and a standard BNC video connector.

### Wide-range AC or DC power supply

The wide-range 12 - 28 VAC or DC power supply allows flexible connection, with image quality unaffected by voltage changes. The line-lock feature on AC power synchronizes the camera, maintaining a stable, roll-free picture and eliminating color changes.

### Compact, discreet design

All FlexiDome cameras have a compact, unobtrusive design. With a protrusion of only approximately 80 mm (3.15 inches), the virtually flush-mounted appearance makes them ideal for prestige environments such as banks, hotels, reception areas and galleries.

## FlexiDome<sup>XT</sup> Impact resistant for tough professional applications

Bringing extra protection to the well established FlexiDome line of discreet dome cameras, the FlexiDome<sup>XT</sup> is a rugged, impact-resistant camera for tough professional applications. This compact dome camera is the ideal choice for indoor and outdoor situations where cameras are at risk of accidental or intentional damage.

### Excellent performance out of the box

High performance is achieved right out of the box, with automatic backlight compensation and advanced digital signal processing. The varifocal lens, together with pan, tilt and rotation adjustments, allows simple selection of exactly the required field of view.

### High level of protection

FlexiDome<sup>XT</sup> combines a high level of protection with a stylish and compact design that harmonizes with any environment yet does not attract unnecessary attention. At the same time it offers the high performance of every Bosch product. Image quality is excellent, even under difficult operating conditions, thanks to its high sensitivity, color fidelity and resolution.

### Impact-resistant camera at an attractive price

FlexiDome<sup>XT</sup> offers all the benefits of an impact-resistant dome camera with varifocal lens that meets the highest professional standards, but at a much lower cost than conventional reinforced cameras. This makes it an economic, no-compromise choice for use in higher-risk areas, avoiding possible loss of surveillance coverage and the costs of replacing damaged cameras.
